High-DPI displays are the flavour of the moment, but the Dell Precision M4800 marks the first time weâ€™ve seen such a screen on a business-class machine. That isnâ€™t this monster of a workstation laptopâ€™s only talent though. Not only is its 15.6in panel super crisp, UltraSharp FHD (1920x1080), itâ€™s also one of the finest-quality displays weâ€™ve tested.
