A little smaller, lighter and with lower fuel consumption, the 1050 Adventure stands proudly alongside its larger siblings. It is a supremely competent and well equipped motorcycle at an attractive price. Traction control with different modes and ABS come as standard. The engine is built with the same state-of-the art technology as the 1190 engine and even though the engine is a little smaller, it delivers nearly the same power and torque up to 95 hp (70).
