Stock Code: BX35
Boss Audio 3-Way Electronic Crossover Retail Box 1 year Limited Warranty
Product Overview
Get even better sound using the Boss Audio BX35 3-Way Electronic Crossover. Speakers reproduce sound based on high, low, or mid-range frequencies. This process is called the crossover effect and occurs because the vast majority of audio systems cannot cover the entire spectrum sufficiently to minimize sound distortion and maintain an appropriate frequency ratio. A lot of amplifiers have either a built-in variable crossover so that you can set the frequency at exact sound specifications or a fixed crossover. By connecting the BX35 to your amplifier, you will have total control you exactly how you want your bass to sound as well as your mid level and high level frequencies, giving you a pristine listening.
