

4age 16v20v Toyota Twincam Turbo Clutch Setup (5700 R)

Location **Gauteng, Midrand**
<https://www.freeadsz.co.za/x-111682-z>

I've got a strong clutch setup for a 4age 16v, perfect for turbo application. Consisting of a radius engineering bell-housing, a 20v "big" flywheel with a opel TS pressure plate. Nice things is the TS pressure plate bolts onto the existing holes of the Toyota flywheel so no unnecessary holes drilled and tapped for that. Spacing ect for the clutch plate was sorted out by Sybie Coetzee at Nitro performance and was balanced by the guys at Dynamic Balancing. Because it's using a TS pressure plates i had a 3x button clutch plate made in 228mm(opel TS) size so it uses the whole TS pressure surface. Also included are ARP flywheel bolts. I hade to clean up the bell-housing on the inside to clear the bigger pressure plate. Everything cost me R5700.00 but price is negotiable. 083 231
