

Solar Generator - Combat Power Outages (28895 R)

Location **Gauteng, Pretoria**
<https://www.freeadsz.co.za/x-113341-z>

Here is a practical and economic way of coping with power outages and Load shedding.

This unit comes with 2 large 250w solar panels

If you wish to keep the peace with your neighbours then this is the answer. These units are silent, require no maintenance and are easier to operate and install than a standard dish washer. Generators are very noisy, require regular servicing and consume a great deal of fuel over time. The cost of running a generator per Kwh used will always be more expensive than Eskom. Solar by contrast will always be cheaper than Eskom.

What makes these units special is that they can handle outages for more than 3 hours (depending on the load). They are particularly suitable to keep your TV, decoders, Lighting, computers, modems up and running. They also have USB power outputs to charge mobile phones or iPads etc.

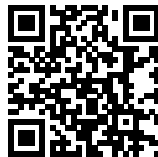

The best part is that these are transportable so that if you sell up and move you can take the entire system with you. We stock 1000Watt and 1500Watt
