DMC Power Chip for the Suzuki LT-R450

The DMC Power Chip increases the LT-Rs RPM ceiling by 1000 RPM over the stock limiter. Thoroughly tested to unleash the true capabilities of the LT-Rs motor, its one-piece design is bulletproof and has no exposed or loose wiring and requires no fasteners or mounting plates.

The DMC Power Chip installs in less than 2 minutes and simply plugs into the LT-R's diagnostic port. It also reduces the OEM fuel map restrictions to maximize engine performance. For riders craving to tap into maximum power, we highly recommend adding an Afterburner exhaust and the all new DMC EFI Control Module for additional adjustability.

Testing has shown this lethal combination produces gains no less than 7hp! Unleash your LT-R with the DMC Power Chip.

We do major & minor repairs and Services to all and sell bikes without learners or license on monthly payments 100's of bikes send mail address for a price list and application form from 34 dealers in Gauteng.
