

# Smanos WiFi PSTN Alarm System (2988 R)

Location **Gauteng, Pretoria**  
<https://www.freeadsz.co.za/x-129615-z>

W100

- iOS7-compatible
- Backup lithium battery of 1200mAh
- 110dB internal Siren volume
- LED screen & touch panel

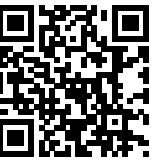

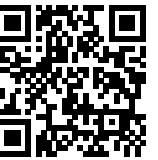

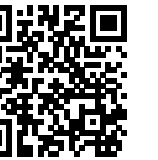

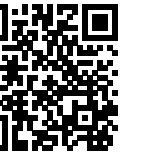

The W100 is a dual-network, WiFi/PSTN friendly alarm system, with very simple wireless setup and no mechanical keys to wear out. Simply plug in a PSTN landline, follow easy setup steps via WiFi, and voila your house is protected. You can then control the entire system via smartphone app commands, and when an alarm is triggered, preprogrammed numbers will get a notification call or a push message.

The PSTN connection is the primary line of defense. If an alarm is triggered, the system dials out to preprogrammed numbers for appropriate response; authorized numbers can also dial in for necessary setup changes. The WiFi connection is IEEE802.11b/g compatible and works as a backup. If an alarm is triggered and the landline is compromised, the system can still send out alerts and accept smartphone app commands. Dual networks, double the security.

Up to six phone numbers can be preprogrammed for emergency notifications. The W100 alarm controller communicates with its detectors and sensors on proprietary 868MHz, making all signal transmissions stable and interference-free.

The free app is available for both iOS and Android smartphones and enables you to stay connected to your W100 no matter where you are in the world. The app interface is intuitive to operate on and is

aesthetic to look at, just like its hardware.
