Panaboard is a revolutionary whiteboard that improves the efficiency of all types of meetings, both daily discussions and major presentations, and also allows information to be effectively shared between presenters and participants, and even with people who cannot attend.

After a meeting, Panaboard scans and prints out the information written on the board.

This eliminates the need for taking notes during the meeting so everyone can concentrate on the discussion. Printouts of the board's information accurately convey the content to people who could not attend. This also prevents problems from mistakes in taking notes.

This board is in working condition with two full cartridges.

The normal price for a board like this is about R27 000 – R30 000. Our price is R12 000.
