## Solid Poplar Wood Table with Steel Cross Legs

This HIGH Quality Table is made of SOLID POPLAR WOOD with Steel cross legs.

This is a CONTEMPORARY style designed product with STEEL crossed legs. Dimensions are approximately 2000mm x 900mm. This table is made from Solid Poplar wood (Populus canescens).

Populus canescens, the grey poplar, is a hybrid between Populus alba (white poplar) and Populus tremula (aspen). It is intermediate between its parents, with a thin grey downy coating on the leaves, which are also much less deeply lobed than the leaves of P. albus. It is a very vigorous tree with marked hybrid vigour, reaching 40 m tall and with a trunk diameter over 1.5 m – much larger than either of its parents.

It is also known in South Africa as Cottonwood or (Populier boom). The timber is tough, with low bending strength and stiffness, and medium resistance to shock loads.

If you would like this table in a different type of wood, please call me for a quotation or email me at [info@nuni.co.za](mailto:info@nuni.co.za)

Shipping cost is not included in the price. The product must be collected from us in Pretoria or delivery can be arranged in the Gauteng area at an additional cost
