Notes : The Sony NEX-EA50UH has the higher quality 18-200mm servo zoom lens that sony has stopped shipping and provided a cheaper lens on the current model. The camera does amazing auto-focus including face detection and spot focus, ideal for a 'gun and gun' setup where no focus puller is required while everything remains perfectly in focus, no mistakes first time round. focus is always pin

sharp and maintains continuous auto-focus. No other camera apart from the Sony FS700 and up can provide this function. If you not a good manual focus puller and still want amazing DOP with autofocus esp with a slider or unassisted operation setup, this is the solution and has helped me in many situations. The Ninja comes in original hard case, with 2 batteries charger and docking station - however does not include the fire ware or usb cable and has a few dead pixels on the top left of the lcd but works perfectly and does not affect monitoring of the image.

I will also consider offers for individual items if interested msg.
