Please read before you phone me:

I have for sale a ford bantam 1.6i that needs a little bit of work. It has a 17 inch mags, radio CD not even sure if it works, suspension needs attention. You will probably have to exchange the bumper, interior need some work. The car sometimes starts and other times it doesn't then it will need a push. Think it's wires as I changed the starter. I can give the car away for R32,000 if I take out my magwheels and you bring your own wheels to fetch the car. My prices are non negotiable, so lets not waste each others precious time.

The car was used by my cousin for 2 years and he is just not a person with TLC, I took the car back as I need to buy a bigger Bakkie for my business and that's the reason for sale, otherwise I was gonna sort out the problems and keep it. The Car runs and was driven from Limpopo back to me the owner over the weekend. Papers are in my name and expiry is end of October 2016
