Feeling like youâ€™re on the verge of getting sick? Have a infrared sauna installed as early as possible. Why? Because the infraredâ€™s radiant heat will stimulate circulation, rev up the production of white blood cells and rally your immune systemâ€™s response to invaders. All that action will make your body a much less hospitable environment for germs to grow â€” and a great place for them to die. Even if youâ€™re not on the verge of coming down with something, remember that infrared saunas, and the increased circulation that comes with regular use, are also great for speeding muscle recovery too.
