Hi, I have a nissan 1400 bakkie with a ca18et turbo motor. Nice leather seats. Conversion was done by maus and the did everything from suspension to brakes. Car has competition rally mags stiff suspension and much more. We just rebuilt whole motor but one valve bent due to timing. i replaced all valves but now car does not want to start. A head specialist said it could be something small not more than R1000 he should just seat the valves and scheme the head but i do not have time for it., Extra ca 18 motor wil be given and R5000 for decent swop .

Whatsapp for potos to appreciate it. 45000 neg or to swop for
