

LATEST Samsung Galaxy S7 Onyx Black To Sell or Swop (7999 R)

Location **Gauteng, Johannesburg**
<https://www.freedasz.co.za/x-175473-z>

The beauty of what we've engineered is to give you the slimmest feel in your hand without compromising the big screen size.

And the elegantly curved front and back fit in your palm just right. It's as beautiful to look at, as it is to use.

Water & dust resistant -With the Galaxy S7, you don't have to worry about putting your phone down on wet surfaces. You can carry on using it even after dropping it in water. You can play games by the pool, post selfies at the beach and call for a cab in the rain. They've been awarded the IP (Ingress Protection) rating of 68. *Can be immersed in 1.5 meters of water for up to 30 minutes

Materials of craft -Samsung spent a long time perfecting the curves of the Galaxy S7.

Using a proprietary process called 3D Thermoforming, we melded 3D glass to curve with such precision that it meets the curved metal alloy to create an exquisitely seamless and strong unibody.

Comfortable grip

The dual-curve backs on the Galaxy S7 are the reason why they feel so comfortable when you hold them. Everything about the design, from the naturally flowing lines to the thin form factor, come together

to deliver a grip that's so satisfying, you won't want to let go.

...the most important hole money can't buy lives in your hand when there's no sun, high light either indoors or the sun has set. With the Galaxy S7 and S7 edge, that won't be a problem. The brighter

1.7 lens and larger 1.4 μ m pixels on the image sensor capture so much more light that your photos come out sharp and detailed.

Dual Pixel 12MP - Each and every one of the pixels on the image sensor has two photodiodes instead of one, meaning the professional-grade Dual Pixel Sensor can focus as quickly and as accurately as you would with your own eyes.
