Hi, guys, had some spares lying around so built the following system. Excellent for normal office/student/children, not so much for gaming, though. Also, note the system comes with a legit copy of Windows 7 Basic 32bit and Office 2010. Both are original discs with CD-KEYS. Ran burn in test for 24 hours and was still running rock solid. The system specs is as follows:

Hardware:

Intel Core 2 Duo E7500 2.9GHZ
 2GB Single Channel DDR3 533MHZ
 Asus P54G41T-M LX3 (LGA77)
 X2 500GB Seagate Sata
 Samsung TSSTcorp Multi Writer
 D-Link DWA-525 Wireless PCI card

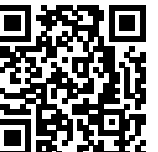

Software:

It also has the following software loaded, the machine is clean loaded so it's ready to go:

Windows 7 Home Basic (32 bit)

Office 2010 (32bit)
 AntiVirus
 Malware Reader

Intel Core 2 Duo E7500 2.9GHZ system. Not looking to sell this as you are supposed to your own system located in the Centurion.
