Product Overview

The Logitech X300 Bluetooth Portable Stereo Speaker delivers powerful, room-filling sound in a well-made, versatile form factor with a Bluetooth wireless range up to 10 metres. The speaker is surprisingly well-made given the affordable price. Most of the X300 is made of rubberized plastic which gives it a nice, grippy feel and helps it stay anchored to your desktop. Another nice feature is the versatile design, which allows you to listen to music with the speaker sitting horizontal, or propped up vertically on either side and it stands up fine no matter how you position it.

The X300 also has a built-in Microphone , which is good for when you're listening to music and don't want to miss a call. The built-in lithium-ion battery life is estimated to be at around five hours of continuous play. The top of the speaker is home to most of the controls, including two Volume buttons and a Bluetooth button, the Power button, which is located on the rear end of the speaker.

Across from the Power button you'll find a 3.5mm Aux input and a Micro USB port for charging the built-in lithium-ion battery with the included micro-USB cable. Engineered for wide-range sound, the drivers are uniquely angled for a more expansive sound spectrum. Connect your smartphone or tablet for a mobile

theatre experience

2.00 Powerful, go-anywhere sound: Best bass response with greatest mid- and high-range in 100-watt

• Wireless freedom: up to 10 metres wireless connectivity to Bluetooth-enabled smartphones, tablets

and notebooks

u € Calls + control Adjust volume and manage calls from the speaker or your mobile phone

€ Expansive sound spectrum: Unique angled drivers deliver a wide-range mobile sound experience

Features

Powerful Sound Designed For Performance

Logitech X300 Mobile Wireless Stereo Speaker POWERFUL SOUND DESIGNED FOR PERFORMANCE. Play your music out loud anywhere in big, bold sound. A completely new go-anywhere design with unique angled drivers pumps out a more expansive sound spectrum. Instantly connect your Bluetooth-enabled smartphone, tablet or laptop with one touch to enjoy music and calls in richly detailed sound.

Jaw-dropping stereo sound

Only 150mm (5.9 in.) long, this surprisingly powerful compact speaker delivers deep, precise bass response and detailed mid and high range sound.

Wireless freedom

No cords, no docks, no worries. Take your music anywhere. Wirelessly connect and play music from your Bluetooth-enabled smartphone, tablet or laptop up to 30 feet away from the speaker.

Calls + control

With a built-in microphone, the X300 doubles as a mobile speaker for phone calls. Connect your Bluetooth device, manage calls and adjust volume with the tap of a finger.

Wide-range sound

The drivers are uniquely positioned facing up and out to create a more expansive sound spectrum. Connect your device and instantly enjoy a mobile theatre sound experience.

Extended playtime

Enjoy 5 hours of continuous music without recharging. Easily recharge the built-in lithium-ion battery using the included micro-USB cable.

For audio playback

Smartphones, tablets and other devices that support Bluetooth ®-wireless audio profile [Advanced Audio Distribution Profile (A2DP)] or 3.5 mm audio output.

For phone calls

Phones that support Bluetooth-Hands-Free Profile (HFP1.6)

Platform Compatibility

Compatible with popular smartphones and tablets. Some functions may not be supported depending upon your phone, tablet and/or application.
