Pushed way out of its comfort zone and into a high-stakes flagship redesign last season, Samsung's back to what it does best -- making itself comfortable at the top of the heap. OK, it sounds like a bold claim but by no means incredible if you've seen the Samsung Galaxy S7 edge.

Yet, this isn't exactly a galaxy far, far away. The Samsung Galaxy S7 edge looks a lot like its predecessor, and we've heard a lot of people calling it the same device. Can't blame them really - Samsung indeed focused on refinement this time around and if you caught our regular Galaxy S7 review, you'd know we liked what they come up with.

Anyway, the real deal is on the inside. If only you look at the features it brings back, such as water protection and a microSD slot, you may conclude that the Galaxy S7 edge is what the S6 edge should've been.
