## Promate Procube Rechargeable Wireless Cu Retail Box 1 Year Warranty

## Wireless Stereo system and Docking Station for Apple, Android and BlackBerry devices

## Product Overview

Simply put, the Promate proCube is the be all and end all wireless speaker system. At its most basic, the proCube is a docking station for all Apple and Micro-USB devices that transmits audio to the wireless speakers, but it is really so much more. The proCube takes its name from its cuboid speakers, which are detachable, have individual volume controls and can even be panned (selecting stereo left or right). The speakers charge from the larger docking station which has its own in-built EQ. The dock comes with adaptors that charge both Apple and Micro-USB devices (and plays music from Apple device) and a 3.5mm audio jack for all other music devices. With a 30 meter range, the speakers can be positioned anywhere for the most perfect stereo audio experience imaginable. Also coming with a USB dongle to transmit directly from your computer, a remote control and a sleek design, the proCube is pure audio genius, through and through.
