Hi.This is a road worthy 5000watt 48volt battery powered vehicle with a built in battery charger as well as 450watts worth of solar panel for charging. Top speed is about 50km/h with a range of about 20-40km. It has a closed van body but this can be removed and converted to a 6 seater.The price for a new one is around R250 000 , making R95 000 very fair. No more fuel cost! The only reason I am selling is because I need startup capital for a project. Thanks. Kevin 083 375.
