People are faced with many things they don't yet understand. They have been told that learning is the key to their future. But it is a mean trick to tell someone that he must learn and then not teach him HOW to learn.

This special edition "Learning How To Learn" contains fundamental principles of L. Ron Hubbard's researches into the field of education, where he isolated the basics which underlie all learning. His breakthroughs resulted in Study Technology, the first subject which actually deals with HOW to learn. Study Technology is basic to any specific subject since it deals with learning itself, the barriers to learning and remedies for these barriers. This is a breakthrough in the field of education for anyone and everyone.
