It has VR6 ventilated disks and calipers in front.It has golf 1 shocks in the front and back.It's running a Dictator STD management system.It has a 2L 16V Mazda EGi motor with a gas flowed head and intake,with superboss valve springs.It has a race knife edged crank and an L-ringed block.The van was turbo and if you want the turbo setup I'm asking R15000 for it.With the setup that's currently in the van it's making 90kw,with the turbo setup it made 300kw at 1 bar.
