

Paraffin geyser, Stainless steel. R3995-00

Location **Gauteng, Vereeniging** https://www.freeadsz.co.za/x-208828-z

BENEFITS OF SHESHA SHISA PARAFFIN GEYSER.

- 1. The PARAFFIN GEYSER is very efficient and heats water from cold to +/- 85 degrees C in less than 40 seconds. The water temperature can be controlled with the inlet valve.
- 2. It guarantees hot water to a family 24 hours a day, any time they need it for as long as they need it. (You only light it when nou need warm water.)
- 3. The PARAFFIN GEYSER is manufactured from stainless steel and is completely maintenance-free. It will last for more than a life time.
- 4. At R3, 995-00, it is half the price of low pressure solar geysers.
- 5. The PARAFFIN GEYSER should give +330 liters of hot water at shower temperature per 1 liter of fuel. The geyser has been tested by Professor Lloyd of UCT. His test results showed that it consumes 15gms of fuel for the water to reach peak temperature.
- 6. Compared to a 100 liter electrical geyser, the paraffin geyser reduces electricity consumption by 64%. It will reduce the monthly electricity bill substantially.
- 7. Electricity rates have become unaffordable for most of our communities. By installing the Shesha Shisa paraffin geyser, even consumers with electricity supply can save a significant amount on their monthly bill which could be used to buy food or take care of their families.
- 8. The Shesha Shisa paraffin geyser is very safe and has passed the safety tests of the S.A.B.S.
- 9. Paraffin is the cleanest burning fuel in the industry. It has a 98% clean burning factor and is therefore green-friendly. The chimney pipe extends through the roof and whatever little fumes are generated is

cost solar and the associated maintenance or replacement.
