At a Glance...

Bring the large screen to your home, office or classroom with the 130 Inch projection size of the Ocular-View 800 Lumens and a 800:1 contrast ration present a colorful sharp image for you to enjoy Energy efficient and long lasting 20000 hour LED lamp saves USB, SD, AV and HDMI ports bring great connectivity to this portable projector

OCULAR-VIEW HOME CINEMA PROJECTOR

The Ocular-View Projector is a great way to get a cinema style screen of up to 130 inches diagonally, for a fraction of the cost of a large screen TV. Its light, compact and easy to transport so you can share the life size viewing fun with friends and family. The native resolution offers 800x480 clarity and a 800:1 contrast ratio means you will enjoy deep blacks and bright colors letting this 800 lumen project create a wonderful home cinema experience.

Utilizing LED technology allows the Ocular-View projector to be more compact and with a typical lifespan of 20000 hours, several times the life of lamps in conventional projectors so the lamp is unlikely to ever need replacing. The other advantage is that with LED lights you use considerably less power and the projector will not heat up anywhere near as much conventional lamp projectors.

When it comes to connectivity the Ocular-View LCD projector has an AV port, HDMI, and SD port as well as a 3.5mm audio output port. This does not mean you can't connect a laptop or PC to the projector up to 130 inches. Complete your setup with a laptop or PC, a media player, a screen, a remote control or alternatively play media directly from a USB hard drive or USB memory stick. The Ocular-View projector could think of itself as being able to display anything you wish to see on a screen with a projector when using the Ocular-View projector.

The built in speakers offers a respectable output that can fill a small room and by using the 3.5mm audio output port you can easily complement these with some external speakers for that full on cinematic sound effect.

This Ocular-View LCD projector comes with a 12 months warranty, brought to you by the leader in electronic devices as well as wholesale.
