Hercules WAE Bluetooth® 3.0 Speaker-Pink-Total power output: 2 x 6 W RMS , Peak power: 24 W,Built-in power supply,Rechargeable battery , Built-in microphone Retail Box 1 year Limited Warranty

Hercules, the expert audio solutions designer, is excited to unveil the new speakers range for its Wireless Audio Experience (WAE*) product line. To satisfy even more unique tastes and expectations of music enthusiasts, these speakers boast incredible portability, battery life, interconnectivity and sound.

Driven by Hercules' passion for music, the new BTP03 Mini speakers were designed to reach listeners of all kinds whether they enjoy music via a computer, smartphone or tablet. By taking listening to the next level, the new speakers allow listeners to enjoy the power and emotion of music almost everywhere they go.

Designed with more than 30 years of audio and wireless innovation experience, these WAE speakers are remarkably crafted with the listener's needs in mind -- whether users are looking for superb acoustics, a speaker for more on-the-go use, or the perfect solution for listening to all of the music stored on a smartphone.

At barely over 165mm wide and weighing 320g listeners will be amazed by the battery life and audio clarity of such a small sound system. This new super-compact Bluetooth 2.0 speaker is easy to slip into a purse or bag, allowing users to take it anywhere and wirelessly stream music and audio stored on a

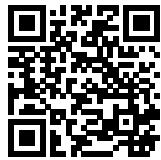

smartphone or tablet. The BTP03 Mini boasts 14 hours of battery life (at 80 percent volume), so users can enjoy listening to their favorite tunes for a long time. The BTP03 Mini features five drivers and a dual bass reflex port for deep, clear sound.

As a built-in microphone, the IP03 Mini Handsfree Speaker can be used as a speaker. Connecting the speaker to a hi-fi system (using a mini-jack cable) turns the speaker into a

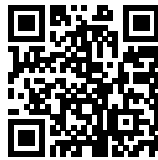

Bluetooth receiver that lets users stream music from their smartphone or tablet. Bluetooth A2DP multipoint technology lets users connect two phones at the same time; it takes just a few seconds to switch from one phone to the other (depending on the phones' connection).
