

Huanso Wireless IP Camera Home Alarm System

Location **Gauteng, Johannesburg**
<https://www.freeadsz.co.za/x-29876-z>

Product Description

Smart Socket--Control Household appliances directly from your smartphone using our user friendly Android App (Sosmarthome, downloadable from Google Play Store)
 Door/Window Alarm--Magnet contact sends door/window open alarm direct to smartphone.
 Fire Alarm--Sends fire/smoke alarm direct to smartphone. (Fire/Smoke sensor optional extra)
 Gas Alarm--Sends gas leak alarm direct to smartphone. (Gas sensor optional extra)

Smartphone Alarm---Not only can it record, but also send an alarm directly to a smartphone to stop. Old IP cameras can only record video, and lets you only playback video after an incident. With this system you are in control

Non-stop Alarming--Smartphone Alarm will send a non-stop alarm sound and vibration to your mobile phone until you disable the alarm.

Other's IP camera's will send an email or push notification, which may not always be seen/read immediately. So you may miss an incident completely.

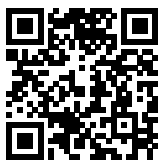

Another great feature is that you can setup up to 5 smartphones to be notified at the same time. Other systems are limited in the amount of devices it can send alarms to.

Siren--Unit has a very loud siren to frighten away any unwelcome person.

Built-in PIR Sensor--Human body heat detection to avoid wrong detection. Other IP cameras are motion detection only.
 P2P Play---No need to use DNS/Port forwarding need any PC. Easy to setup in 1 minute.
 No need to use cable and/or complex installation. Completely DIY, you can get a lot of help from the installation video.

Integrated but Low Cost--The complete package is very competitively priced. It will cost much more if purchased independently, and cannot work as a complete solution as in this package.

App wifi Setting---Easily setup via Wifi on your smartphone, no need to use a computer anymore. Other IP devices still require installation of desktop software on computers to setup wifi, and are much more difficult to setup and use.

Video playback from SD card---Easily playback recorded video from SD card on smartphone, no need to use a computer anymore. Other IP devices playback is done via a computer or you should take the SD card out, and are very difficult to use.

Alarm sound Selectable---Alarm sound type can be selected to distinguish against phone call sound.
SD card recording---Not only live viewing but can also record video.
720P=1200TVL---Super clear video.
Fashionable design.

Similar software for all---HUANSO IP camera's, DVR's, NVR's, mini DVR's, Smarthome Alarm Systems, IP doorphone, all use similar software/Apps, making it really easy to use a variety of Huanso Products at the same time.

Package Contents:

- 1 x IP Camera
- 3 x Wireless Smart Wall Sockets
- 2 x Wireless Door/Window Sensors
- 3 x Wireless PIR Movement Sensors
- 1 x Siren

Ease of use is the way to go

The following video shows how to setup the system -
