Hi,

I am selling my computer specs are:

- i7 3770 @ 4.3 Ghz
- Galax 980ti 6GB Hall of Fame edition
- 8gig Ram G.Skill 1600Mhz
- Gigabyte Z77X-ud3h mobo
- Cooler Master Silencio 240m Cpu Cooler
- 248 GB Samsung SSD
- 2TB Seagate HDD
- Chieftec 750watt bronze semi modular PSU
- RaidMax Cobra Z case

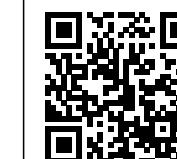

This is what a real gaming pc looks like not like the other i saw on Junkmail.

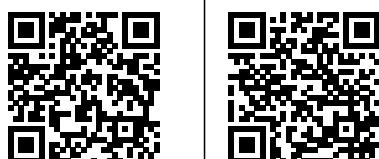

This Machine can obviously play any game on ultra with too much fps to spare with all filters on its the best graphics card that you can find... The case is nice and small so you have a power house that can be transported with ease... I am negotiable but i know what this PC is worth so no low balling... you can buy only the PC without the 980 ti for R12000...you can contact me via email, phone, or
