About Copper and Cobalt in Uganda Call, What's App On? +27781701667 Copper has been found at several localities in Uganda but the only significant deposit discovered to-date has been at Kilembe, where copper-cobalt supplied mineralization occurs. The other areas where copper mineralization has been noted are Bobong in Karamoja region and Kampono and Kitaka in Mbarara district. Copper is also reported in Buhweju, Bushenyi district. Although copper was first reported at Kilembe in 1908, the deposit was not brought into production until 1956 on completion of the railway line to Kasese. Between 1957 and 1979 a total of 16.29 million tons ore averaging 1.95% Cu and 0.18% Co were mined and treated to yield 217,000 tons of blister copper which was exported, plus 1.1 million tons of coralliferous pyrite (iron supplied) which was stockpiled.
