What are (Cytotec) Safe Medical pills?  
The Safe Pill should not be confused with the morning after Pills as it is intended for use within the first 12 weeks of pregnancy whereas the morning after pill should only be used within 3 to 5 days after intercourse. The Medical Safe pill, Misoprostol, is an approved pregnancy termination method in South Africa

How does Medical Pills work?  
Both abortion pills, mifepristone and misoprostol, are usually used in order to terminate a pregnancy. Mifepristone causes the embryo to detach from the uterus thereby cutting off essential nutrients and oxygen carried by the blood. Misoprostol is then taken two days later and triggers the evacuation of the embryo remnants through the vagina. This often appears as a heavy period.

Are Medical Pills safe?  
The Safe Medical Pills is usually safer than a medical abortion or surgical Service but should only be

considered up to 24 weeks (Or 7months) of pregnancy. Medical Safe pills can be delivered to you just
