Dear Customer,

We the Mercury Chemical Consultant Group have seven many zonal designations around the globe and we guarantee a 100% assurance for a perfect work-done to any of our client/customer.

There is no risk to be taken in this transaction because we use a computerized cleansing detergent and none of our client/customer pays money up-front before the completion of his/her defaced currency, we work on (20%) in agreement that we will be providing all the required Materials, Chemicals and Activation Powder including Machine to complete the work and we will be taking our percentage as soon as the job done.

So, I advise any individual/companies/cooperate bodies who have such defaced currency to act swiftly to the completion of their notes, especially those that are having a defaced dollar because the American federal treasury has declared and invented a new design of a \$100 bill (i.e. the old \$100 bill MAY not be tenderly useful at the market in the nearest future).

In-case our client does not live nearby; we convey the materials/chemicals to any country by sending our various Representatives/Technicians. Everything about the shipment of the materials/solution to any countries is free of charge BUT remember that the 20% cannot be DENIED after the cleansing of your defaced currency. If understood and accepted, I request you to send us the details below:
