RANDBURG ABORTION CLINIC 0633523662

What is abortion?((( 0633523662)))

Abortion is when a pregnancy is ended so that it doesn't result in the birth of a child. Sometimes it is called 'termination of pregnancy'.

Randburg abortion Clinic cares for women with an unplanned or unwanted pregnancy. We treat thousands of women who've decided that abortion is the right choice for them, and give advice and counselling to women who don't know what to do next.

There are two types of abortion treatment, 'Medical' and 'Surgical' abortion

1. Medical abortion: The abortion pill

Some women feel that a medical abortion is a more natural process. There are two types of medical abortion

Abortion pill (also known as early medical abortion) up to 10 weeks

Involves taking medication to cause an early miscarriage (women experience cramping, pain and heavy bleeding).

No surgery or anaesthetic.

Abortion pill from 10 weeks up to 24 weeks

Involves taking medication to cause the womb to contract and push out the pregnancy.

2 visits to the clinic are needed.

1st visit is an over-the-counter abortion pill. 2nd visit is a surgical abortion.

9 weeks gestation in women quick, mild, no pain. There are two types of surgical abortion:

1. Vacuum aspiration up to 14 weeks

Removes the pregnancy by gentle suction.

2. Dilation and curettage (D&C) up to 24 weeks. This can be done with local anaesthetic.

Option means you can have the clinic unattended and drive home.

Up to 15 weeks it can be done with sedation, relaxed and sleepy.

One visit to the clinic and you go home the same day.

---

Dilatation and evacuation between 15 and 24 weeks

Carried out with general anaesthetic.

The pregnancy is removed using narrow forceps passed through the neck of the womb and some gentle suction.

One visit to the clinic and you go home the same day.
