A woman who wants to have a miscarriage can take medication to miscarry at home. One of the medical terms for termination of pregnancy is "abortion". An "abortion" can be due to miscarriage. The terms "abortion" and "miscarriage" are used interchangeably in medical terminology. Treatment with this medication allows a woman to have her miscarriage in a timely fashion in the privacy of her own home. Abortion Pill Procedure - Pregnancy Termination Pills Medical abortion is a procedure that uses medication to end a pregnancy. A medical abortion doesn't require surgery or anaesthesia and can be started either in a medical office or at home with follow-up visits to your doctor. It's safer and most effective during the first trimester of pregnancy. Medical abortions are performed with abortion medication rather than using surgery. The procedure usually can be completed at home. which induces something similar to contractions, causing the body to expel the embryo. How to end unwanted pregnancy Some women prefer the use of pills to terminate a pregnancy because: It may be used in early pregnancy. It may be used at home. It feels more natural, like normal menstruation.

It is less invasive than an in-clinic abortion.
