ABORTION /TERMINATION PILLS ON SALE CALL; +27736996907

Abortion is the ending of pregnancy by removing a fetus or embryo from the womb before it can survive on its own. An abortion which occurs spontaneously is also known as a miscarriage. An abortion may be caused purposely and is then called an induced abortion, or less frequently, "induced miscarriage". The word abortion is often used to mean only induced abortions. A similar procedure after the fetus could potentially survive outside the womb is known as a "late termination of pregnancy". Modern methods use medication or surgery for abortions. The drugs mifepristone and prostaglandin are as good as surgery during the first trimester Abortion pills are now available to ease the stress of unwanted pregnancies Call; +27736996907 or Email; dr_juma@ymail.com delivered worldwide
