In 'Designated Facility'

What is a 'Designated Facility'?

The termination pill is a medicine that is taken in the morning and evening as it is used to use with the  
the use of the pill is to increase the chances of the pill being used within 5 days  
The use of the pill is to increase the chances of the pill being used within 5 days  
The use of the pill is to increase the chances of the pill being used within 5 days

How does termination pills work?

Both termination pills, mifepristone and misoprostol, are usually used in order to terminate a pregnancy.  
Mifepristone causes the embryo to detach from the uterus thereby cutting off essential nutrients and  
oxygen carried by the blood. Misoprostol is then taken two days later and triggers the evacuation of the  
embryo remnants through the womb. This often appears as a heavy period.  
It is advisable that you consult with your medical practitioner for a further understanding of how the

---

termination pill works.

#### IS TERMINATION PILLS SAFE?

The termination pill is usually safer than surgical termination but should only be considered in the first 12 weeks of pregnancy. Like any procedure, use of the termination pill can result in complications but if used under the supervision of a medical doctor, the chances of complications are greatly reduced. Your doctor will be best suited to handle any complications should they arise.
