
Service is available for pregnancies 2 weeks-22weeks

Is a telemedicine abortion safe?

Telehealth for abortion pills is safe and effective, providing the same care as in-person visits at our centers. Throughout the process, an on-call nurse is available for support.

Tele-Abortion consultations are only 20 minutes long

You will be provided with all the necessary information to collect your medication or have it delivered to your doorstep after the teleconsultation process is complete. This option is completely SAFE and is conducted by our specially trained service providers who will be available to guide you through the whole process.

What is included in the price?

Consultation

Abortion pills

Pain medication

Contraceptive pills (optional)

Aftercare services

Telemedicine Abortion Eligibility

In the consultation, your medical history will be assessed to determine eligibility. If telehealth is not deemed safe for you, our staff will guide you in scheduling an appointment at one of our clinics.

Alternative options such as in-center medical abortion or same-day surgical abortion may be discussed.

Tele- medicine

Post Abortion Contraception

Included in the price of our Tele-Abortion service, you will receive post abortion contraceptive pills. Speak to one of our trained service providers who will guide you through the process of finding the most suitable contraceptive pill for you.
