

Power wedge 214p (4500 R)

Location Gauteng, Johannesburg
<https://www.freeadsz.co.za/x-40558-z>

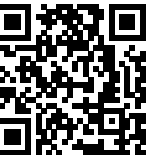

provide protection against potentially damaging power surges coming through the electrical line.
clean the incoming power of EMI and RFI noise while not inducing any resonances.

offer outlets configured exclusively for the special needs of amplifiers.

prevent the power line distortions caused by amplifiers drawing large amounts of current.

isolate each piece of source equipment to ensure that internally generated noise can not influence other components in the system.

provide the power configuration best suited to each individual system.
