Datsun 280zx with an imported front and rear body kit to give the look of 260z. This is the very scarce short wheel base 2 seater model not the usual 280zx 4seater.it has had the wheel arches professionally widened as per the photos.The engine is a very sought after Chev 400 with all the correct upgrades this is coupled to a corvette t56 6 speed manual gearbox via a button clutch . It has a performer RPM intake manifold with a Holley 750 double pumper. This car is very very powerful with a fantastic sound .it also has a set of genuine compomotive split rims with good tyres it has xenon lights just recently fitted.this car was built by Dave Miller .if you have a cobra or a Chev and you want to transform it then this is the perfect answer , to build this engine and gearbox alone would cost you in excess of
