The affordable new MT-07 is going to introduce newly qualified riders to everything that is best about real motorcycling - and it's also ready to remind those more experienced riders what they've been missing for all these years. Our designers have focused on the things that really matter to riders. So they developed an economical 689cc inline 2-cylinder engine that produces more riding excitement per cc thanks to its deep and linear torque at low to mid speeds. And for instant controllability and easy handling we've equipped this accessible new naked bike with one of the lightest, slimmest and most agile chassis designs in the.
