

Did you ever loose your cellphone in the past (200 R)

Location **Gauteng, Vereeniging**
<https://www.freeadsz.co.za/x-64262-z>

Here is the main functions of the Bluetooth finder for keys, pets, luggage etc...

1.Bidirectional Search:

Firstly, with the app on your phone, you can find your keys, your dogs, your luggage and anything you left anywhere at home or your office or the airport.(The app can even show you the distance between you and your items.)

Secondly, it can also be used to find your phone when you cannot find it anywhere at home or the office or somewhere you often go.

Thirdly, before you leave for some place, you can check if the items are with you or not. (With the app, more than 8 finders can be connected.)

2.One-Click Photo & Auto Focus

This device can be used as a remote shutter, when going out with your friends, you can take photos as you like, and no longer ask anyone for help.

3.Last Location Tracking

When the distance between your phone and the finder reaches it's limit, the finder will automatically track it's own location and send a signal to your phone, then your app can track the location and you will know where you have lost your finder.

4.Anti-Lost Function:

When Bluetooth distance is out of 20-30 meters and disconnected due to weak signal, the cellphone will alarm and remind you the key or other objects will be lost. We didn't have this function before, but some of our users asked if we can add this function into the app, so the new version of the app has this.
