The EOS 100D is a fully-featured, responsive DSLR that is also small and light enough to take everywhere. The ideal camera to document your lifestyle. Shoot 18-megapixel photos and Full-HD video wherever you are and enjoy great performance in low light. A 1.6 crop factor ISO sensor (native ISO range 100-12,800) allows you to shoot images that are clear and low in noise, full of atmosphere. Easy and enjoyable to use. Compose your photos using the bright, responsive optical viewfinder or use the 1,040,000-dot 7.7cm (3.0â€•) Clear View II Touch screen to control the camera. Navigate menus, review pictures and even focus and shoot by tapping, swiping and pinching.

Simple operation â€• fantastic results

Canon's Scene Intelligent Auto technology analyses the scene and sets the most appropriate camera settings automatically. And as your photography develops a built-in Feature Guide will teach you how to get the most from the camera.

Capture Full HD movies

Shoot high-quality video at resolutions up to Full-HD (1080p). Take control of exposure, focusing, sound and more, or use the Video Snapshot mode to capture edited movie sequences in-camera. Hybrid CMOS AF II provides continuous focusing while shooting, ideal for keeping moving subjects sharp.

Capture the action

Track and shoot fast moving subjects at 4 fps and take advantage of nine AF points to focus swiftly and accurately, even with off-centre subjects.

Taking your next creative steps

Express your creative side with one of the EOS 100D's Creative filters. Extra Effect Shot captures a filtered and unfiltered shot simultaneously. Choose from Grainy Black & White, Toy Camera, Miniature Effect and more, and preview the effect of each filter before you shoot.

A mode for whatever you are shooting

Theme-based Scene modes automatically choose the right camera settings for the subject you're shooting. Choose from Portrait, Landscape, Sports, Kids, Food and more. And when you're ready, progress to Creative Auto mode for more control over factors like background blur, via an intuitive interface.

Lens:

The EF-S 18-55mm f/3.5-5.6 IS STM Lens from Canon is a standard zoom compatible with Canon APS-C format cameras. It features a focal length range of 18-55mm which is equivalent to 29-88mm in the 35mm format. Optical Image Stabilization provides the equivalent of up to four stops of shake correction for clear imaging, even in low light.

A high-precision aspherical element reduces chromatic aberration throughout the zoom range for high resolution and contrast. The lens supports Canon's EOS Movie Servo AF feature for smooth and quiet continuous autofocusing during movie recording. This feature is enabled by the use of a six-group zoom system plus a stepping motor focusing mechanism. Additionally, manual focus adjustment is possible

while shooting in AF mode, and an internal focusing system enables faster performance, maintains an overall compact lens form-factor and allows for a closer minimum focusing distance of 9.8".

The front element of the lens does not rotate during focusing, allowing you to use polarizing filters without a problem. Optimized lens coatings ensure precise color balance while minimizing ghosting and flare, and the 7-blade circular diaphragm produces pleasing background blur.

Optical Image Stabilization provides up to 4 stops of
