iBlazr LED Smartphone Flash

As the world is taking selfies and is moaning about low light pictures and dull pictures, here comes the Selfie Flashlight for Smartphone!

Yes, we take photos of basically everything in the known universe with our smartphones. Its how we roll these days, and best to just accept it. But the one persistent drawback with this is trying to get a good pic at night or in low light without a good flash for your smartphone. And lets face it, in these social media times, if you didnt snap a pic and share it, did it really happen?

Well, fret no more, and say hello to your new little friend: iblazr, a new LED flash, designed for smartphones. This little flash also comes in handy when taking photos with tablets or DSLR cameras, lighting analogue photography, brightening nighttime video calls, or simply functioning as a small but powerful flashlight.

This little gadget will add a flood of light to your phone, making image brighter and enabling lower ISO and high shutter.
