There are loads of dishes many mere mortals avoid, because they involve the use of a large pot of oil. From French fries and spring rolls, to tiny cakes, and even baked eggs - if you can cook it in the oven or in the deep fryer, you can probably make it in the Airfryer. Using Philips' patented Rapid Air technology, the Airfryer super heats air and swirls it quickly in the belly of the compact appliance, cooking, frying, and baking food quickly and easily, using almost no oil (you can add some for flavour if you wish, but it isn't necessary to cook the food).

- Compact home appliance that uses hot air and the natural fats (or a small amount of oil) to cook food
- Perfect for small families and couples, to prepare smaller batches of food
- Unique design to drain excess fat from food during cooking
- Holds up to 800g of food at one time
- Low odour and low or no oil
- Cord storage keeps kitchen surface neat and tidy
- Dishwasher safe parts for easy cleaning
- Non-slip
