30AMP 12V-24V SOLAR CHARGE CONTROLLER

The 30A PWM Solar controller is for off-grid solar systems and control the charging and discharging of the battery.

The intelligent charging process has been optimized for long battery life and improved system performance

Major functions

- Automatic identification system voltage, 12 volts/24 volts.
- Humanized LCD displaying and double button operation of man-machine interface.
- High efficiency intelligent PWM 3stage charging.
- The load control mode can be selected; the timer function can be reset for street light at night.
- Reliable over voltage protection: short circuit protection, over load protection, overcharge protection, over-discharge protection
 - Accurate temperature compensation, correcting the charging and discharging voltage automatically, improving the battery lifetime
 - Roundly reverse connected protection
 - Solar panels, battery, solar charge controller positive poles are all connected together, adopting negative MOSFET in series control circuit.
